Cold Beam Games  
Publisher:  
Cold Beam Games  
Release Date: 16 Jun, 2011

a09c17d780

English,French,Italian,German,Dutch

---

The dev took his already excellent game and set the level all the way to eleven.

You get more types of enemies (bosses included), new perks and online multiplayer.

The online multiplayer features co-op and head-to-head modes and has a nifty feature: the game indexes the songs you have on your PC, usually the ones found in the same folders you've been playing. When playing against someone else, it compares both lists and any track that shows on both of them will be playable as well as the included ones.

It is well worth the 3,99! This DLC make me forget my ship exist over all the lights...

seriously where the hell is my ship in those lights?. Why are you reading this?? Just buy it. Assuming you own Beat Hazard. Don't have Beat Hazard? Why are you reading this?? Go buy it.. are you a fan of music?  
are you a fan of having epilepsy?  
are you a fan of spaceships?

If you answered yes or no to any of the above this then this is the perfect game for you

Have a relaxing game of epileptic seizure inducing, space ship shooting, rhythm based mayhem.  
Throw on a your favorite drum'n'bass, techno or classical music and max out visuals to 200% (thats higher than 100% by a full 100%!)

Thats not even touching on the community workshops where you can get your mitts on some brazenly beautiful custom ships.  
Want to dart around as pastel colored miniature equine? sure enough you can.  
Want to float around as a Drumpfs hair shooting aliens like they're...well aliens? i guess you can..  
Want to slip and slide past the enemy ships as the face of pepe the frog? i mean you can but why do you want to do that?

all in all this game has everything you need and more.  
5V7

. I play this game when we are on drugs :) I'm always the best!. if you're a fan of Beat Hazard on the 360 or even PC, do yourself a favor and grab this DLC, it makes the game a hell of a lot more fun. One of the best DLC packs ever, most dev would release this as 'Beat Hazard 2'.. This game is simply amazing. I don't even have to say alot. Just make sure you have some intense music and good headphones, to add to the experience. I would have payed full price without a question.

---

This game rocks literally, one of the best shooters I have played so far. the game is influenced by your own music tracks. The higher the tempo or intensity, the crazier the game gets. Non stop shoot 'em up action and as much intensity as you can handle with many different difficulty levels. You can also desing your own ships for the comunity to try out and compete on. i bought this during the Steam Summer Sale so i got a great deal on it too.

Total Score 9V10.. Buy this, turn visual feedback to 200% And enjoy the awesome lightshow!! :D. New enemies, new bosses, collecting money to buy benefits for your gameplay, change of gameplay, more challenges, the enemies are following your music more than you used to, you can switch from classic to ultra when opening the game. Hell yeah definetly worth the extra 5 bucks!!!:D. This DLC is just amazing. More weapons, enemys and game modes. You can play a Co-op or a versus match with your friends or random players. It's more challenging than any other music games that i have played befor.. Instead of trying to make the game more accurate to the beat of your music, they threw a buttload of new powerups, weapons, and gameplay mechanics in. Now whenever you rank up you get to unlock a perk. Using in-game credits you get for playing songs you can upgrade these purchased perks (more mini-missiles, longer super lasers, etc.). This adds a lot more depth and replay value compared to the "classic" game (which is still accessable on launch) and compared to other rhythm games on steam.

I used to prefer Audiosurf but it has aged poorly and Beat Hazard has received loads of upgrades. This is my favorite rhythm game on steam and probably one of the best available because of all the work the devs have put into it. Thank you for last.fm integration!
